Interactive Systems (H)
Lab exercise sheet – week 8

This week's lab work is not assessed and there is nothing to submit

Individual work

The remaining lab exercises, including the second Assessed Exercise, will now be solo work. There is no more team work on this course, although you will still attend lab groups in Microsoft Teams, are still free to open group calls during lab sessions and can still make use of the Chat.

However, especially for remaining assessed work, you should be aware of the School's plagiarism policy, as contained in Appendix A of the Undergraduate Class Guide (available at https://moodle.gla.ac.uk/course/view.php?id=21505).

VR survey analysis

Week 6's lecture discussed a study of VR use on aeroplanes. In this week's lab, we will be exploring real data from this study, and analysing and visualising it in several ways.

Download the Jupyter Notebook file from moodle, and work through the instructions.

It has been tested with python 3.8.5

Please ask your tutors for help if you are having trouble with setup etc.

We will discuss solutions in the lab next week. **You do not have to submit this work anywhere.** However, if you get any parts working well and don't mind them being shared with the class, then paste them into your group chat.
